

*“Whenever you see a successful business, someone made a courageous decision.”*

*Author: □ Peter F. Drucker*

RGB Services was established in 2005 providing HR consulting services, specializing in Mergers and Acquisitions services as well as Client representation services in collective bargaining agreement initiatives, assisting companies effectively negotiating contracts with organized labor unions.

In late 2006, owner and President, Rick Bohn, became co-founder of two other companies that provide Contract Manufacturing Services, which allowed RGB Services to expand its Client base as well as restructure its overall services provided. During the next three years, RGB Services partnered with these two newly established companies to start up 7 new manufacturing sites located in 5 different states.

At the end of 2009 when preparing the 2010 business plan, it was decided that RGB Services would relocate west to the Greater Phoenix area and establish itself with a variety of new applications and services.
